Office of the Editor: Tulegatan 41, P.O. Box 19 111, S-104 32 Stockholm 19

Contents

Volume 23, 1971

NUMBER 1

R. E. Munn and H. Rodhe: On the meteorological interpretation of the chemical composition of monthly precipitation samples 1

A. Dingle and D. Gatz: Trace substances in rain water: Concentration variations during convective rains and their interpretation 14

P. Hobbs, G. Bluhm and T. Ohtake: Transport of ice nuclei over the North Pacific Ocean 28

K. Isono, M. Komabayasi, T. Takeda, T. Tanaka, K. Iwai and M. Fujiwara: Concentrations and nature of ice nuclei in the rim of the North Pacific Ocean 40

S. Hastenrath: On meridional circulation and heat budget of the troposphere over the equatorial Central Pacific 60

A. Vulquin: Arguments en faveur d'une mousson en Amazonie 74

R. Long: Finite amplitude disturbances in a rotating fluid 82

A. Wiin-Nielsen: On the motion of various vertical modes of transient, very long waves. Part 1. Beta Plane Approximation 87

T. J. Simons: A note on non-geostrophic baroclinic stability problem 99

L. E. Covez: Mountain waves in a turbulent atmosphere 104

Shorter Contribution

V. Brahmananda Rao: Dynamic stability of the zonal current during a break monsoon 111

NUMBER 2

J. A. Johnson, C. B. Fandry and L. M. Leslie: On the variation of ocean circulation produced by bottom topography 113

M. E. Stern: Generalizations of the rotating flame effect 122

G. Kullenberg: Vertical diffusion in shallow waters 129

T. Royer and R. Reid: The detection of secondary tsunamis 136

F. W. G. Warren and J. S. A. Green: Bounds for initial growth rates on a non-geostrophic f plane with lateral walls 143

C. L. Liu and K. C. Yeh: Excitation of acoustic-gravity waves in an isothermal atmosphere 150

F. L. Ludwig and E. Robinson: Observations of aerosols and droplets in California stratus II 164

M. Kopcewicz and B. Dzienis: Mössbauer study of iron in atmospheric air 176

K. R. Saha: Mean cloud distribution over tropical oceans 183

Errata

P. Dergarabedian and F. Fendell: Estimation of maximum wind speeds in tornadoes 196

NUMBER 3

P. Morel, G. Lefevre and G. Rabreau: On initialization and non-synoptic data assimilation 197

A. Wiin-Nielsen: On the motion of various vertical mades of transient, very long waves, Part II. The spherical case 207

F. Baer: Energetics of low-order spectral systems 218

W. Chróscícki: Solar climate of the Swedish territory. Selected problems 232

E. K. Bigg, Z. Kviz and W. J. Thompson: Electron microscope photographs of extra-terrestrial particles 247

Shorter Contribution

W. DE ROP: A tidal period of 1 800 years 261

Letter to the Editor

Y. P. RAO and B. N. DESAI: On the instantaneous distribution of vertical velocity in the monsoon field and structure of the monsoon circulation 263

K. R. SAHA: Reply to Rao and Desai 266

Corrigendum

D. N. SIKDAR, V. E. SUOMI and C. E. ANDERSON: Convective transport of mass and energy in severe storms over the United States—An estimate from a geostationary altitude 267

Errata

B. R. PERSSON: ^{210}Pb-Atmospheric deposition in lichen-carpets in northern Sweden during 1961–1969 268

NUMBERS 4–5

P. W. FISCHER and A. WIIN-NIELSEN: On baroclinic instability of ultra-long waves 269

C.-M. TANG: The stability of continuous baroclinic models with planetary vorticity gradient 285

W. BLUMEN: On the stability of a barotropic shear flow to non-geostrophic disturbances 295

D. R. ROSEN: Vertical transport of mean zonal kinetic energy from five years of hemispheric data 302

K. MIYAKODA and O. TALAGRAND: The assimilation of past data in dynamical analysis. Part I 310

K. MIYAKODA and O. TALAGRAND: The assimilation of past data in dynamical analysis. Part II 318

L. BENGTSSON and N. GUSTAVSSON: An experiment in the assimilation of data in dynamical analysis 328

A. S. MONIN and I. L. VULIS: On the spectra of long-period oscillations of geophysical parameters 337

B. S. GALLAGHER and W. H. MUNK: Tides in shallow water. Spectroscopy 346

J. WU: Observations on long waves sweeping through short waves 364

W. R. HOLLAND: Ocean tracer distributions: Part I. A preliminary numerical experiment 371

R. C. ALEXANDER: On the advective and diffusive heat balance in the interior of a subtropical ocean

J. P. KUETTNER: Cloud bands in the earth's atmosphere. Observations and theory 404

R. A. DUCE: Difference in chemical composition of atmospheric sea salt particles produced in the surf zone and on the open sea in Hawaii 427

A. MÉSZARÓS: On the variation of the size distribution of large and giant atmospheric particles as a function of the relative humidity 436

V. HAVLOVIC and J. O. SNIHS: Distribution of natural radioactivity on the environmental submicronic aerosols 441

R. K. MANCHANDA, P. C. AGRAWAL, S. BISWAS, G. S. GOKHALE, P. K. KUNTE and B. V. SREEKANTAN: Stratified regions of high radioactivity in the atmosphere over Hyderabad, India, in April 1968 455

Shorter Contribution

M. J. JONES: Ammonium and nitrate nitrogen in the rainwater at Samaru, Nigeria 459

Letter to the Editor

H. RODHE: Interpretation of time variations of particle borne radioactivity 462

Reply

T. S. CHEN, N. BECK and K. KURODA 463

Errata

K. R. SAHA: Mean cloud distributions over tropical oceans 464

NUMBER 6

R. L. GALL and D. R. JOHNSON: The generation of available potential energy by sensible heating 465

D. V. CHALIKOV, A. S. MONIN, V. G. TURIKOV and S. S. ZILITINKEVICH: Numerical experiments on the general circulation of Venus' atmosphere 483

V. P. STARR: Some dynamic aspects of the Jovian and other atmospheres 489

S. PANCHEV and D. SYRAKOV: Spectra of thermally stratified turbulent flow with no shear 500

K. Stewartson: On trapped oscillations of a rotating fluid in a thin spherical shell 506

H. van Loon: A half-yearly variation of the circumpolar surface drift in the southern hemisphere 511

W. G. Zdunkowski and W. K. Crandall: Radiative transfer of infrared radiation in model clouds 517

H. Hänsel and H.-J. Wilke: Über einige Möglichkeiten zur Durchführung spezieller geophysikalischer Analogieexperimente mittels stationärer elektrischer Entladungen 528

H. J. E. Fischer: Hydromagnetic symmetrical terms for the zonal kinetic energy equation 535

A. Bjerhammar: Estimation with singular inverses 540

Shorter Contribution

W. Bischof: Carbon dioxide concentration in the upper troposphere and lower stratosphere. Part II 558
